### **DETAILED ACTION**

This office action is in response to Applicants' paper filed 15 September 2003.

#### ***Rejections and Objections***

***(Maintained/Withdrawn/New)***

#### ***Withdrawal of Objections and Rejections***

1. The rejections and/or objections made in the prior office action, which are not explicitly stated below, in original or modified form are withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. Applicants' arguments will be addressed to the extent that they pertain to the present grounds of rejection.

#### ***Claim Rejections - 35 USC § 112***

2. (Withdrawn) Rejections of claims 1-22 and 31 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, are withdrawn due to Applicants' arguments and amendments, which were found persuasive.

3. (New) Claim 35 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the relative term "high" regarding purity. "High" is vague and indefinite wherein there are no upper and lower boundaries for the measure of purity.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. (New) Claim 35 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a "written description" rejection, rather than an enablement rejection under 35 U.S.C. 112, first paragraph. Applicant is directed to the Guidelines for the Examination of Patent Applications Under the 35 U.S.C. 112, ¶ 1 "Written Description" Requirement, Federal Register, Vol. 66, No. 4, pages 1099-1111, Friday January 5, 2001.

*Vas-Cath Inc. V. Mahurka*, 19 USPQ2d 1111, states that "applicant must convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention. The invention, for purposes of the "written description" inquiry, is *whatever is now claimed*" (see page 1117).

A review of the language of the claim indicates that these claims are drawn to a genus, i.e., the genus of calcium ion-binding proteins of high purity in a single peak as determined by gel filtration chromatographic analysis. A description of a genus may be achieved by means of a recitation of a representative number of species falling within the scope of the genus or of a recitation of structural features common to the members of the genus, which features constitute a

substantial portion of the genus. *Regents of the University of California v. Eli Lilly & Co.*, 119 F3d 1559, 1569, 43 USPQ2d 1398, 1406 (Fed. Cir. 1997). In *Regents of the University of California v. Eli Lilly* (43 USPQ2d 1398-1412), the court held that a generic statement which defines a genus of nucleic acids by only their functional activity does not provide an adequate written description of the genus. The court indicated that, while applicants are not required to disclose every species encompassed by a genus, the description of the genus is achieved by the recitation of a representative number of species falling within the scope of the claimed genus. At section B(1), the court states "An adequate written description of a DNA ... requires a precise definition, such as by structure, formula, chemical name, or physical properties, not a mere wish or plan for obtaining the claimed chemical invention".

There are many species claimed that are within the scope of the claimed genus, *i.e.* calcium ion-binding proteins of high purity in a single peak as determined by gel filtration chromatographic analysis. The disclosure of one or two species may provide an adequate written description of a genus when the species disclosed are representative of the genus. However, the present claim encompasses numerous species that are not further described. There is substantial variability among the species.

One of skill in the art would not recognize from the disclosure that the applicant was in possession of the genus of calcium ion-binding proteins of high purity in a single peak as determined by gel filtration chromatographic analysis. The specification does not "clearly allow persons of ordinary skill in the art to recognize that [he or she] invented what is claimed" (see *Vas-Cath* at page 1116). Applicant is reminded that *Vas-Cath* makes clear that the written

Art Unit: 1654

description provision of 35 U.S.C. 112 is severable from its enablement provision (see page 1115).

### ***Claim Rejections - 35 USC § 102***

6. (Withdrawn) Rejection of claims 1 and 23 under 35 U.S.C. 102(b) as being anticipated by Bryant *et al.* 1983, is withdrawn due to Applicants' arguments, which were found persuasive.

7. (New) Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by Bryant *et al.* 1983 (cited in previous office action). Claim 35 is a reach through claim wherein the intended limitation is that the proteins were obtained through the method of claim 1; however, this is not an appropriate limitation, thus, the claim is interpreted as any calcium binding protein purified by any method. Bryant *et al.* discloses such purified binding proteins on page 712, left column and figure 2.

### ***Claim Objections***

8. (Withdrawn) Objections to claims 24-30 and 32-35 for depending from rejected claim 23 are withdrawn due to Applicants' arguments/amendments regarding claim 23.

9. (New) Claim 32 is objected to for the following informality: the claim 32 lacks appropriate spacing in the phrase "claim 23wherein" wherein there should be a space between "23" and "wherein".

### ***Conclusion***

Claims 1-31 and 33-34 are allowable, with claim 32 being objected to for minor informalities. Claim 35 is rejected.
